PRIMARY EXAMINER

Continuation of 3. In the response after final (6/17/2005), the applicant argues that Alvarado et al reference fails to disclose that individual bands of the plurality of bands contain different therapeutic agents or individual bands of the plurality of bands are made of different polymers and where the band further comprises a first layer and a second layer. The examiner, respectfully, disagrees. As claim 34 is currently written, it can be interpreted broadly that the Alvarado reference at least discloses the use of two different therapeutic agent (i.e., the therapeutic agent comprises anticoagulants, antiplatlet agents and antibacterial agent, see col. 14, lines 7-20 and lines 30-34. Further, As claim 35 is currently written, it can be interpreted broadly that the Alvarado reference at least discloses the use of a variety of different polymers (see col. 13, lines 36-64), and where as best seen in fig. 3c of Alvarado, elements 42a, 42b can be interpreted broadly as a first layer and a second layer. Accordingly, the above noted reference is still considered to read on claims 34-36.
